

## INTRODUCTION.

1. The sixth edition of the Indian Word Code for Foreign State telegrams should be brought into use on the date officially notified, from which date the fifth edition will become obsolete; copies of that edition should be kept by the holders for one month longer and then destroyed.

2. *Names of Stores*—The names of items of stores have for the most part been omitted from the present edition of the Indian Word Code and included in the 1910 issue of the India Office Stores Code.

3. *Issue of the Supplement*. . . . . of separate Supplements, which will be issued by the matter contained in former issues, so

4. *Issue of Lists of Corrigenda*—Any corrections that it may be necessary to make in the Code, either on account of printer's errors, or by reason of phrases becoming obsolete, will be notified in Lists of Corrigenda.

5. *Telegraphic Addresses*—The telegraphic addresses registered in London are shown on pages xi to xui, and those registered in India on pages liii to xvi and xxviii to xxxiv. Attention is specially invited to the Important Note in paragraph 11 below.

6. In compiling this edition of the Indian Word Code, advantage has been taken of the regulations laid down in the International Telegraph Convention by which 5-letter code words, pronounceable according to the usage of several languages, joined together to form 10-letter groups, are charged for as one word. This should lead to greater economy in telegraphing, but has rendered necessary great changes in the arrangement of the book.

7. The code groups differ from one another by at least two letters, in order to diminish the risk of incorrect interpretations arising out of telegraphic errors. The code groups are built up on a system of values described in the instructions, which has the further advantage of providing an easy means of

for as two words . . . . . of more than two letters, which, if sent *en clair*, would be charged

8. Economy is the sole object of this code, and it is hoped that users will forward suggestions for improvement for consideration in the next edition.

the suggestions will, as far as practicable, be embodied in the Code by means of a Supplement or by Lists of Corrigenda.

9. Special attention is drawn to the specimen messages on pages ix and x. They provide examples of the way in which messages should be coded and written down for transmission, and illustrate the uses of the various appendices.

10. To obtain the maximum of economy when using this book, every possible word should be rendered into code. Specimen message 4 shows how the cost of a message is reduced by half, although, with the exception of significations including numbers, no 5-letter code group represents more than a single word.

It is obvious that economy is not likely to result from the codifying of proper names which are not already in the dictionary. These as a rule should be sent *en clair*. For the same reason, serial numbers of telegrams should not be coded.

11. A list of holders of the code, together with their telegraphic addresses, is printed on pages xvii to xxvii.

The Code words given against the titles and designations in the vocabulary of the Code, other than those included in the lists of registered addresses referred to above, are intended to be used in the body of telegrams only, and their use in addresses is inadmissible.

### ORDER OF WORDS AND PHRASES.

2. The arrangement of a code always presents difficulties. This book has been arranged as far as possible on strictly alphabetical lines. It is believed that this arrangement is the best. Cross references have been made for long phrases under *each* of the important words composing them.

3. Capital Letters separated by full stops are treated as words; thus I.S.O. will be found as if written Iso.

4. When optionals occur in the course of a phrase, they are to be disregarded for the purposes of alphabetical order. Allowance should therefore be made for this, particularly as regards the words "A" or "The", which appear very frequently. For example :—

"If the latter" comes immediately after "If known" and not after "If the"

6. All these 5-letter code groups are made up on a value system in which the groups are prepared on a numerical basis, each letter having a numerical value corresponding to its place in the alphabet, namely :—

A = 1	H = 8	O = 15	V = 22
B = 2	I = 9	P = 16	W = 23
C = 3	J = 10	Q = 17	X = 24
D = 4	K = 11	R = 18	Y = 25
E = 5	L = 12	S = 19	Z = 26
F = 6	M = 13	T = 20	
G = 7	N = 14	U = 21	

7. The "value" of a group is arrived at by adding together the numerical values of all the letters in the group, and then if the numerical values will amount to 20, thus —

example, the sum of the numerical values of the letters forming either of the code words **ABAEK** or **ZEWYS** is 20, thus —

A = 1	Z = 26
B = 2	E = 5
A = 1	W = 23
E = 5	Y = 25
K = 11	S = 19
Total 20	Total 98
	Deduct 78 (26 × 3)
	Total 20

### CORRECTION OF TELEGRAPHIC ERRORS.

8. If a corrupt group cannot be rectified by filling in the word or words suggested by the context, the coder should try for an error in a single letter

9. If one letter only is wrong, it can be easily corrected by applying the value system, in the manner explained by the following example —

10. If a group is received which is not a valid group, for each amount to be deducted, add 26 to it before the deduction is made.

B = 2	X = 24	B = 2	B = 2	B = 2	B = 2
E = 5	L = 5	A = 1	E = 5	E = 5	E = 5
F = 6	I = 6	F = 6	B = 2	F = 6	F = 6
Y = 25	Y = 25	Y = 25	Y = 25	U = 21	Y = 25
L = 12	L = 12	L = 12	L = 12	L = 12	H = 8

12. Errors of more than one letter in a 5-letter group are rare, and the correct version can only be found by a process of elimination. A Terminational List (Appendix IX) is included to assist in this process. The various combinations of 2-letter errors to be tried are, say, for a group such as DADEF—

The table below will also be found to be of assistance in the detection of errors. It shows what letters are liable, when rendered in Morse telegraphic symbols, to be mistaken for other letters.

### FORM OF TRANSMISSION.

13 The groups forming the message for transmission should be made up into 10-letter groups. This saves expense. (See specimen messages and Introduction, para. 6)

### NUMBERS.

14. Cardinal Numbers (including phrases which commence with a cardinal number, *e.g.*, "35 feet") are printed in Appendix I (pages 644 to 668), and are not included in the dictionary.

15 Such numbers as are not assigned groups in this Appendix must be coded by two or more groups. For this purpose special "plus numbers" (*e.g.*, "3000 +") are provided. The plus sign indicates that the number is not complete by itself, and that the number following is to be added to it. The final number obviously must not be a "plus number."

*Example:—*

$$236,019 = \begin{cases} \text{(i)} & 200,000 + = \text{Y K I V E} \\ \text{(ii)} & 36,000 + = \text{Y I P M I} \\ \text{(iii)} & 19 = \text{X U Z Y B} \end{cases}$$

16 Numbers commencing with a Decimal Point (*e.g.*, ".303") will be found on the first page of this Appendix. Other numbers containing a decimal point appear under the number which precedes the decimal point (*e.g.*, "9.2" inches appears under "9"). In all other cases the groups signifying "Decimal Point" must be used.

17. The Ordinal Numbers from "First" to "Hundredth" inclusive will be found in their alphabetical order in the dictionary. Those higher than this must be coded in two or more groups employing "plus" numbers as explained above.

*Example:—*

$$\begin{array}{l} \text{One hundred} \\ \text{and} \\ \text{Ninety fifth} \end{array} \quad \begin{cases} \text{(i)} & 100 + \\ \text{(ii)} & \text{Ninety fifth} \end{cases}$$

18. Fractions will be found at the commencement of the Numbers Section ; a few of them, such as "half," "quarter," are also included as words in the dictionary. Fractions which are not assigned groups should be coded in the following form :—

$$\begin{array}{l} 3 \\ / \\ 26 \end{array} = \begin{cases} \text{Three} & = \text{XOMAS} \\ \text{Fraction Bar} & = \text{WUOOX} \\ \text{Twenty Six} & = \text{XYAAU} \end{cases}$$

19. Phrases for expressing money are included, for example : £271,616. 17s. 4½d. is coded by the six groups :—

$$\begin{array}{l} 200,000+ = \text{YKIVE} \\ 71,000+ = \text{YJNER} \\ 600+ = \text{YEDGE} \\ £16 = \text{XUWEY} \\ 17s. = \text{XUYGU} \\ 4\frac{1}{2}d. = \text{XOTNY} \end{array}$$

i.e., three 10-letter groups.

### **TIMES.**

20 When times are expressed by the 24-hour clock method the following procedure should be adopted. Any time up to, and including, 9.59 a.m. should be coded by one group taken from the Numbers Section.

*Example :—*

$$6\ 10\ \text{a.m.} = 0610 = \text{XEFVD}$$

All times after 9.59 a.m. must be coded by **two** groups taken from the Numbers Section.

*Examples :—*

$$\begin{array}{l} 10\ 5\ \text{a.m.} = \begin{cases} (1)\ 10 = \text{XUHYT} \\ (2)\ 05 = \text{XAYWY} \end{cases} \\ 3\ 30\ \text{p.m.} = \begin{cases} (1)\ 15 = \text{XUSUM} \\ (2)\ 30 = \text{XYDUX} \end{cases} \end{array}$$

### **DATES.**

21 A group for every day of the year is provided in Appendix II, on pages 669–670.

### **SUFFIXES.**

22. Many words exceeding 10 letters in length have been omitted because they are not used frequently enough to justify the allocation of a 5-letter group, and they can be built up of two 5-letter groups. For this purpose the more common suffixes have been included, some of them with optionals.

*Examples :—*

$$\begin{array}{l} \text{"Academical" can be coded by the two groups for} \\ \text{"Compressible" can be coded by the two groups for} \end{array} \begin{cases} \text{Academ} = \text{ACAPY} \\ \text{ical} = \text{ITBOZ} \\ \text{Compress} = \text{DWUUC} \\ \text{ible} = \text{ITAWS} \end{cases}$$

Attention is drawn to the provision in the dictionary of affixes and endings, such as "re," "de," and "ness"; "ent," "er," "ery," "ist," "ilities," "ily," "ingly," etc.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in financial matters.

2. The second part outlines the various methods and tools used to collect and analyze data. This includes the use of surveys, interviews, and statistical software to ensure that the information gathered is reliable and valid.

3. The third part focuses on the ethical considerations surrounding data collection and analysis. It highlights the need to protect individual privacy and ensure that data is used responsibly and for its intended purpose.

4. The fourth part discusses the challenges and limitations of data-driven research. It acknowledges that while data provides valuable insights, it is not infallible and must be interpreted with care and context.

5. The fifth part concludes by summarizing the key findings and recommendations. It stresses the importance of ongoing monitoring and evaluation to ensure that the data remains relevant and useful over time.
